

The Standard.

William Glasemann, Publisher.
AN INDEPENDENT NEWSPAPER.
(Established 1870.)

This paper will always fight for progress and reform, it will not knowingly tolerate injustice or corruption and will always fight demagogues of all parties. It will oppose privileged classes and public plunderers, it will never lack sympathy with the poor, it will always remain devoted to the public welfare and will never be satisfied with merely printing news, it will always be drastically independent and will never be afraid to attack wrong, whether committed by the rich or the poor.

The official paper of Ogden City and Weber County. All legal notices authorized by law to be published by said city and county will appear exclusively in the Evening Standard.

EARTHQUAKE IN OGDEN AND ELSEWHERE.

People living on the bench, who were up late last night, report having felt the earthquake shock which vibrated the base of the Wasatch range from northern Utah to a point south of Salt Lake City.

These seismic disturbances are to be expected at intervals, as the west slope of the Wasatch mountains forms an earthquake zone.

Directly east of Ogden is a cliff, marking the entrance to Taylor canyon. Geologists say that the escarpment is the exposed part of a fault, which has been formed within a recent geological period and that further faulting may be experienced.

Earthquakes are caused by these surface movements of the earth and their severity is in proportion to the extent of the surface action. Were the ground at the mouth of Taylor canyon to suddenly sink a few inches the far might wreck many buildings and the vibrations be felt at a great distance.

But no need worry over these possibilities, as borrowing trouble is a senseless mind condition. Nature moves by a very slow process, and it may be a century or two before the shifting of the rock formation at the base of our majestic mountains is such as to bring about a disturbance of a magnitude to do Ogden any harm. By that time all of the present day inhabitants of this city will be resting in mother earth, wholly unconcerned whether a cliff or a star falls.

THE MURDERER AND CAPITAL PUNISHMENT.

The California legislature is considering the advisability of doing away with the death penalty and Harriet P. Morse, a talented woman, has taken the side of those who are opposed to the old theory of revenging a murder and she presents this argument:

"Shall two lives be blotted out instead of one? Did some poor mother go through agonies unspeakable to bring life into the world, that we may snuff it out?"

"Moreover, are we sure that we did our part? Did we surround this criminal with all that would tend to make his life good and clean?"

"Or did we permit him to grow up among crime-breeding surroundings, and then expect him to resist, the same as his more fortunate brother with both heredity and environment on his side, when the awful test came?"

"If we did not do our part, shall we be utterly inconsiderate with him? Suppose he should turn on us and say: 'Had you sent me to school, had you not put me to work before I was able to work, had you not permitted me to be among the hardened and criminal classes at an impres-

sionable age, had you provided me with work, when grown, so that I could have provided myself with the necessities and comforts of life without which no human being can be normal—that is, clean, wholesome and self controlled physically, mentally and morally—had you done these things, I would not, in all probability, be where I am now."

"Are we so sure that his charges against us are so utterly unfounded that we have a right to refuse to listen to him? Strangle him by the force of our might and superior numbers?"

"As ye would that others should do unto you, do ye even so to them."

"Let us be governed by reason, not revenge; by mercy, not malice. The Colorado and Arizona state wardens have conclusively shown what can be done with the criminal by kindness."

"Let this state be one more added to the white list that will attempt to redeem life instead of take it. And let the first evidence of its belief in humane treatment for the criminal be the wiping from the statute books the time honored and inconceivable cruelty of capital punishment."

A DEFENSE OF THE STENOGRAPHER.

A stenographer has taken exception to a moving picture in which the young lady posing as a stenographer is depicted as wearing "rats," chewing gum and dressing "loud." The young lady makes these comments:

"As a rule the stenographer dresses with the most perfect taste in a neat tailored suit and immaculate shirt waist and also dresses her hair in the most becoming yet modest style, quite in keeping with her position. To be sure, there are a few, but they are in the minority, who may think they are winning laurels by ridiculous attire, imagining that to win they must dress and act in the manner in which these 'movie' managers depict them. They have her pictured as a sort of a senseless 'ninny,' when the real stenographer is a highly refined, educated young woman of the most promising type."

We are on the side of the offended. The girls who develop enough ability to hold positions as stenographers have sufficient common sense to know that modesty is a greater asset than frivolity, and that the admirers to be attracted by dress or actions not in keeping with refinement are certain to be empty-headed and undesirable.

OGDEN BOYS SHOULD TRY FOR THE PRIZE.

The Copper Bank is conducting a potato-raising contest among the boys of Utah, and a special invitation has been extended through the Standard to the school children of Ogden to join in this competition.

The object of the contest is to arouse more interest in this state potato raising. And the bank offers the following figures in proof that potatoes are a better money maker than any other crop grown:

"It is not generally appreciated how much we lose each year by devoting so much of our irrigated lands to the raising of wheat and so little to the raising of potatoes and other small crops which yield higher returns."

"The report of our state bureau of statistics, for instance, shows that in 1910 the farm value per acre of various crops was as follows: Wheat \$20.70, oats \$21.84, barley \$24, corn \$24.08, hay \$25.72, sugar beets \$35.05, alfalfa seed \$65.34, potatoes \$58.68."

"That set of figures carries its own moral. Yet the state's total acreage in wheat is 240,000, while there are but 14,000 acres in potatoes. Of course part of the wheat land is non-irrigated and is therefore unsuited to potatoes or other similar crops. Comparing wheat with potatoes in another way, we notice that the total acreage planted to potatoes in this state was only 6.7 per cent of that planted to wheat, but the value of the potato yield was 26 per cent of the value of the state yield of wheat. Our average production for 10 years is 146 bushels per acre, which is much higher than that of most states, but not so high as Nevada's 155 or Maine's 189. We still have other states to surpass. In our acreage yield we stood second among all the states in 1909, third in 1910 and sixth in 1911. As to quality, only six states stood higher than Utah in the 10 year average."

"In 1910 we stood 34th among the states in total yield of potatoes and in 1911 we stood 27th. This was not entirely due, however, to an increase in our own yield, but partly to a decrease in the crops of other states. We can evidently raise more potatoes to the acre than most of the other states, but we need a larger acreage. Only two acres out of every 100 of our cultivated land are now planted in potatoes."

"We are able to take high rank in the matter of potato raising. The high altitude of Utah is a point in its favor for the potato is at home in such a climate. In fact, it was first discovered by early explorers growing wild in the high ranges of Central America. A very high proportion of the days are clear. Few potato diseases bother Utah farmers. Utah is excellently located for shipment to the big markets both east and west. Utah's production and value of crop is greater than that of most of the states with which she directly competes."

"Not enough attention is paid to

market requirements. The man who can ship straight car loads of a first class variety, true to name, gets the best price for his product, except that which goes to the man who sorts his potatoes, boxes them, and markets them as a fancy product."

"In Utah at present we are willing to ship mixed car loads and are not careful enough to keep our varieties true to name. When a farmer selects a single variety for growing, sticking strictly to that, his crops can be made to yield higher returns."

Now that the school children are to have their garden spots, a number of the students should enlist in this potato contest. If they do not win prizes they at least shall gain an important experience which should be of value to them in the years to come, even though they never become farmers."

ORPHEUM VAUDEVILLE TONIGHT.

NINE MILES OF SIPHONS ON A NEW AQUEDUCT

Nine miles of the 246 in Los Angeles' new aqueduct consist of huge inverted siphons, carrying the water across valleys from one mountain range to another or from tunnel to tunnel. It is claimed by the engineers that no other project has ever used so much steel piping of large diameter, and that siphoning on such a large scale or for such long distances has not been attempted elsewhere. Two of the longest sections are each nearly a mile and a half in length, and there is a third important section that is almost a mile long. The remaining siphons that complete the total mileage vary in lengths from several feet to about one-half mile. The longest section across Jawhorn Canon is 8-135 feet long, and 7 to 10 feet in diameter. It weighs 3,243 tons, and considering the weight of the metal and the size of it, is probably the most noteworthy in the world. The next longest section, the Soledad siphon, 8,960 feet long, and 11 feet in diameter, is the largest pipe ever used for siphoning. A four passenger automobile, with the top raised, was driven through a section of it without grazing. The third siphon crosses Deadman Canon. Says The Inventive Age:

"The steel used in the construction of these siphones is purchased from eastern companies for \$144 per hundredweight. The steel, more than one-half inch thick, is built up in 30-foot sections at the factory and shipped in this condition, each of these sections making a full carload in weight. In order to get the benefit of carload rates on the steel, less than one-half inch thick, it is usually purchased in plates, which are rolled and punched but not riveted together. These plates are 'nested' together on the cars, and after their receipt at the aqueduct are erected by day labor, under the direction of the city of Los Angeles."

"The entire conduit line of this aqueduct, 246 miles in length, extending from its source in the Sierra Nevada mountains to the distributing points, comprise, in addition to the nine miles of siphons, 22.2 miles of unlined canal, 164.22 miles of concrete-covered conduit, 10.11 miles of tunnel through earth, 18.24 miles of tunnel through rock, 1.8 miles of steel flume, 7.5 miles of reservoir length, and 12.5 miles of natural rock bed of stream in a steep canon."

"The aqueduct will cost a little in excess of \$22,000,000, and is designed to supply the city of Los Angeles with water for a possible population of two million, aside from developing about 150,000 horse-power of electrical energy, which will be either sold or utilized by the city. It will furnish a supply of about 200,000,000 gallons of water daily, and until the city of Los Angeles shall require the entire supply, a large quantity of the water will be sold for irrigation purposes."

THE SPIRIT OF HELEN KELLER.

From Collier's Weekly.

Our country is blessed in its visitations, and Bergson, the famous French philosopher, received the welcome he richly deserved. Bergson has shown how matter, ponderous and of close knit fiber, is ever in front of the troubled currents of man's spirit, shutting them off from an easy flow to their place of emergence.

The tides of man's restless spirit, searching for the light as if they were a current in the tunnel of a

Between Women's Health or Suffering

The main reason why so many women suffer greatly at times is because of a run-down condition. Debility, poor circulation, show in headaches, languor, nervousness and worry.

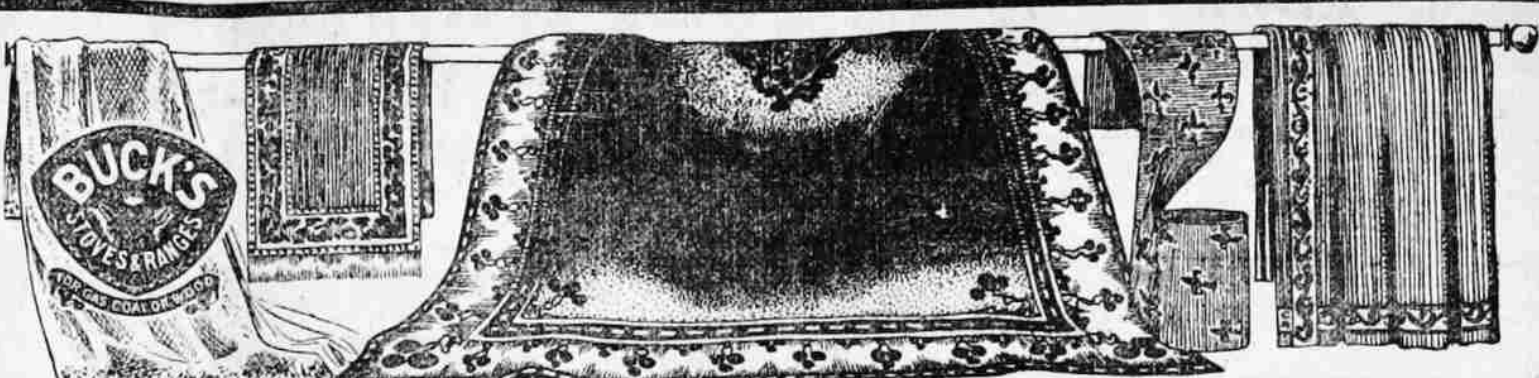

BEECHAM'S PILLS

(The Largest Sale of Any Medicine in the World)

are the safest, surest, most convenient and most economical remedy. They clear the system of poisons, purify the blood, relieve suffering and ensure such good health and strength that all the bodily organs work naturally and properly. In actions, feelings and looks, thousands of women have proved that Beecham's Pills

Make All The Difference

Sold everywhere. In boxes, 10c, 25c. Women will find the difference with every box very valuable.

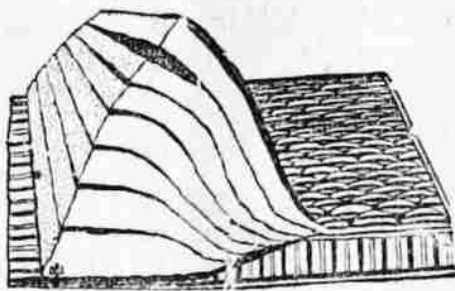

RUGS AND CARPETS

HYRUM PINGREE, Manager

rocky hill, must turn aside from the too great thickness and toughness of the interposing rock and seek a new direction and easier outlet. Then later, after they have gone around and passed beyond the barrier they could not penetrate or undermine, they resume their passage toward the light, picking up the old direction. They do not know defeat, but the thwarting is constant. In all his travels Bergson will hardly find a more perfect illustration of this than in the person of the lovely woman who has gained victories all through life over her two supreme limitations.

Helen Keller has been blind and deaf since infancy, but her spirit has won through every stubborn barrier.

YSEULT.

Farewell, and God be with you, love, and yet—

I do not really part from you—ah, no!

You shall not ever utterly forget. But feel me with you still wherever you go.

So shall you pay a thousand times my debt.

Recalling that which only you can know.

I will encompass you with dreams in spring.

I will be April's self, all green and blue.

I will be leaf and flower, and fruitage, too.

There shall not be one single vivid thing But brings the shadow of me back to you.

And in high moments, when with joy and fear Great passions tear the very skies apart To plant new stars, I shall be very near.

For this is mine—my sole, unchallenged part: Though others hear—or press—your lips, my dear, It will be I who hearken to your heart.

Women who spend most of their time trying to improve their complexions never think of the old-fashioned method of steaming it over a wash tub.

SUMMONS.
IN THE DISTRICT COURT OF Weber county, state of Utah.
Thelma Davis, plaintiff, vs. Samuel J. Davis, defendant—Summons.
The State of Utah to the Said Defendant.

You are hereby summoned to appear within 20 days after service of this summons upon you, if served within the county in which this action is brought; otherwise within thirty days after service, and defend the above entitled action; and in case of your failure so to do, judgment will be rendered against you according to the demand of the complaint, which has been filed with the clerk of said court.

This action is brought to recover a judgment dissolving the marriage contract now and heretofore existing between you and the plaintiff.

T. R. O'CONNOLLY, Plaintiff's Attorney.
P. O. address, 2411 Washington avenue, Ogden, Utah.
First publication, April 5, 1913.

NOTICE.
Will Pay City Warrants.
Notice is hereby given that the undersigned treasurer of Ogden City, will at his office, on and after this date, pay City Warrants bearing Registry Numbers 22445 to 22772 all inclusive, and further that all such Warrants not presented to me for payment, will cease to draw interest after April 15, 1913.

WALLACE FOULGER, City Treasurer.
